<sup>1</sup> The term "members" includes all regular and associate Exchange members, and member firms, general, special and limited partners in member firms, and voting and non-voting stockholders in member corporations.

<sup>2</sup> On the American Stock Exchange, all odd-lot transactions are handled by specialists, and their round-lot purchases and sales for odd-lot account are not segregated from their other round-lot transactions. In odd-lot transactions, customers' purchases are specialists' sales and customers' sales are specialists' purchases.

NOTE: All sales totals include short sales.

## EXPLANATORY NOTES

### FORM 144 FILINGS

Form 144 is a notice of the proposed public sale in ordinary trading transactions of limited amounts of securities owned by persons controlling, controlled by or under common control with the issuer, and by persons who have acquired restricted securities of the issuer.

RECENT REGULATION 13D ACQUISITION REPORTS. Statements containing the information required by Schedule 13D have been filed pursuant to Rule 13d-1 of the General Rules and Regulations under the Securities Exchange Act of 1934 by the beneficial owners listed below. The number of shares of the security which are beneficially owned, and the number of shares concerning which there is a right to acquire are set forth for each beneficial owner.

<u>REPORTING COMPANY OR INDIVIDUAL</u>	<u>ISSUER &amp; NUMBER OF SHARES</u>	<u>DATE FILED</u>

STOCK TRANSACTIONS OF SELECTED FINANCIAL INSTITUTIONS AND  
FOREIGN INVESTORS, THIRD QUARTER 1973

In the third quarter, private noninsured pension funds, open-end investment companies, life insurance companies, and property and liability insurance companies purchased \$9.5 billion of stock as compared to \$12.3 billion in the third quarter of 1972; their gross sales of common stock were \$8.4 billion, down from \$10.6 billion a year earlier. Their net purchases fell to \$1.1 billion from \$1.4 billion in the second quarter and \$1.7 billion in the third quarter of 1972.

The decline in trading combined with the rise in stockholdings brought the activity rate to 19.4 percent, the lowest rate since the third quarter of 1966. Common stock activity rates (the average of purchases and sales divided by the average market value during the quarter) began to rise in the mid-nineteen-sixties, reached a peak at the end of the decade, and have been gradually declining in the past few years.

With the addition of the third quarter figures, the year-to-date gross purchases of selected financial institutions reached a total of \$33.8 billion, compared to \$41.9 billion for the first nine months of 1972; year-to-date sales totalled \$29.6 billion, down from \$34.1 billion in 1972. Net purchases for the first nine months of the year declined from \$7.8 billion in 1972 to \$4.1 billion in 1973.

Statistics for the four groups of institutional investors taken separately reveal that each group followed a pattern similar to that of the four groups combined.

Private Noninsured Pension Funds

Private noninsured pension funds purchased \$4.2 billion of common stock and sold \$3.4 billion, with net purchases of \$0.8 billion in the third quarter of 1973. This compares with \$4.8 billion in gross purchases, \$3.6 billion in sales, and \$1.2 billion in net purchases in the third quarter of 1972. The activity rate of these pension funds fell to 14.4 percent from 16.7 percent in the third quarter of 1972, and reached its lowest level since the fourth quarter of 1966.

In the first nine months of 1973 purchases of private noninsured pension funds totalled \$14.6 billion and sales \$11.3 billion compared to \$17.5 billion and \$12.0 billion respectively a year earlier. Cumulative nine-month net purchases were \$3.3 billion, substantially below the \$5.5 billion in the first nine months of 1972.

The book value of assets of pension funds for the third quarter of 1973 and previous quarters are shown on page 17 of this Bulletin. During the third quarter, the book value of common stockholdings rose \$1.0 billion while net purchases were only \$0.8 billion; the difference between these figures may be

attributed to profit realized on sales of stock. Cash and deposits rose by a much larger percentage than did any other asset category--25 percent, compared to a 2 percent rise in total assets.

#### Open-End Investment Companies

Mutual funds reporting to the Investment Company Institute (a group whose assets constitute over 90 percent of all mutual fund assets) were the only one of these institutional groups that recorded net sales of portfolio stock in the third quarter. They were net sellers of stock in every month of the third quarter, and they were net sellers in each of the last nine quarters; in all but one of the last nine quarters mutual fund redemptions of their own shares exceeded sales.

Gross stock purchases of ICI members were \$3.3 billion in the third quarter of 1973 compared to \$4.5 billion a year earlier; gross sales of \$3.8 billion were down from \$5.2 billion in the third quarter of 1972. However, net sales were \$0.5 billion, only slightly below the \$0.6 billion of the third quarter of 1972. The activity rate of mutual funds dropped dramatically from 40.2 percent in the third quarter of 1972 to 34.6 percent in the third quarter of 1973. The highest activity rate ever recorded for mutual funds was 57.4 percent, during the first quarter of 1971.

In the first nine months of 1973 these mutual funds bought \$11.3 billion of stock and sold \$13.3 billion, with resulting net sales of \$2.1 billion. This compares to gross purchases in the first three quarters of 1972 of \$15.5 billion, gross sales of \$16.8 billion, and net sales of \$1.3 billion.

#### Life Insurance Companies

Life insurance companies purchased \$1.2 billion of stock in July-September, 1973, well below the \$1.6 billion purchased in the third quarter of 1972. Sales of \$0.7 billion also were down from \$1.2 billion a year earlier but their net purchases at \$0.5 billion were up from \$0.4 billion in the same quarter in 1972. The activity rate fell to a five-year low of 17.9 percent. In the first nine months of 1973, gross purchases were \$4.6 billion, sales \$2.9 billion, and net purchases \$1.7 billion, compared to purchases of \$5.1 billion, sales of \$3.3 billion, and net purchases of \$1.7 billion in the first nine months of 1972.

Separate and general accounts, which pursue different investment goals, both showed reductions in stock trading. The activity rate for separate accounts was 21.6 percent as compared with 29.5 percent a year earlier, while that for general accounts was 15.6 percent, down from 27.9 percent in the third quarter of 1972. Separate accounts, which contain variable annuity funds, accounted for 64 percent of net purchases of stock in the third quarter of 1973.

#### Property and Liability Insurance Companies

Non-life insurance companies were also trading at a reduced rate in the third quarter. They purchased \$0.9 billion, sold \$0.6 billion, and had net purchases of \$0.3 billion of common stock, compared to \$1.4 billion purchases,

\$0.7 billion sales, and \$0.7 billion net purchases during the same period a year earlier. Year-to-date purchases declined to \$3.2 billion in 1973 from \$3.8 billion for the first nine months of 1972. Sales, however, rose from \$1.9 billion in the first three quarters of 1972 to \$2.0 billion in the first three quarters of 1973. Year-to-date net purchases fell from \$1.9 billion in January-September, 1972 to \$1.2 billion in the comparable period of 1973.

The activity rate, 16.3 percent in the third quarter was the lowest for any quarter in the prior five years.

#### Foreign Investors

In the third quarter, foreign investors (institutions and individuals combined) purchased \$2.8 billion of common and preferred stock in the United States, down from \$2.9 billion a year earlier. They sold \$1.9 billion, much less than the \$2.5 billion recorded in the corresponding quarter of 1972. Their resultant net purchases, however, more than doubled from \$0.4 billion in the third quarter of 1972 to \$0.9 billion in the third quarter of 1973.

Foreign investors purchased \$9.1 billion of stock in the first nine months of 1973; during that period they sold \$6.8 billion and purchased \$2.3 billion net. Corresponding figures for 1972 were \$10.3 billion purchases, \$9.1 billion sales, and \$1.2 billion net purchases. The year-to-date net purchases of \$2.3 billion for 1973 is the highest recorded total for the first nine months of any year since published figures have been available.

#### Block Transactions on the New York Stock Exchange

Block trading on the NYSE (trades of 10,000 or more shares) is considered an indicator of institutional stock market activity, because the market value of block transactions is highly correlated with the more direct measures of

institutional trading reported above. In the third quarter of 1973, 6,980 blocks were traded, comprising 167.1 million shares, as compared to the third quarter of 1972, when 6,932 blocks were traded, comprising 174.5 million shares. Market value of block trades fell to \$4.8 billion from \$5.8 billion a year earlier; year-to-date market value of block trades fell from \$19.5 billion in the first nine months of 1972 to \$16.0 billion in the comparable 1973 period.

## EXPLANATORY NOTES

### Over-the-Counter Volume in Exchange Stocks

The volume of over-the-counter trading in exchange stocks (sometimes referred to as the "third market") is based on reports received from broker-dealers pursuant to Rule 17a-9 of the Securities Exchange Act which became effective on January 4, 1965 and was revised on April 1, 1967.

Rule 17a-9 requires that broker-dealers who make over-the-counter markets in common stocks traded on the New York Stock Exchange report quarterly their total third market sales of such stocks in which they make markets. They are also required to report certain over-the-counter sales of such stocks in which they do not make markets, as defined in the Rule. In addition, other broker-dealers must report any third market sales which amount to \$25,000 or more if no other broker-dealer intervened in the transaction. The reporting system is designed to reflect all sales to (or purchases by) persons other than broker-dealers, excluding inter-dealer transactions. Over-the-counter volume shown in the tables, therefore, represents sales to individuals and institutions. Secondary distributions and other syndicated offerings are excluded.

Broker-dealers who make markets in New York Stock Exchange common stocks are required to show separately any over-the-counter purchases and sales which involve members of the New York Stock Exchange. These transactions are made pursuant to Rule 19b-1 of the Securities Exchange Act and New York Stock Exchange Rule 394(b) which both became effective November 7, 1966. These sales are included with total over-the-counter sales.

In comparing total third market sales with New York Stock Exchange volume, it should be noted that exchange volume includes preferred as well as common stocks and also includes sales to specialists and other exchange members as well as sales to the public. Member trading on the New York Stock Exchange generally amounts to about 25% of total trading. In comparing third market volume and exchange volume in any given stock, it should be noted in addition that third market volume includes odd-lot transactions whereas exchange volume for individual stocks, as reported by the New York, the Midwest and the Pacific Stock Exchanges, does not include odd lots.

The 50 New York Stock Exchange stocks for which third market volume is shown were selected on the basis of their continuing high activity in the third market. The list of stocks is subject to change from time to time.
